Luisa Fernanda Vaca

Front-End Developer at Globant
Colombia

Extracto

I'm a Front-End Developer who's passionate about creating engaging visual experiences through code. I enjoy challenging myself daily to learn new things to stay up to date on new technologies.

I've worked on projects using mainly HTML, CSS, Vanilla Javascript, jQuery, React.js and Redux. I developed my discipline while learning to code so I'm not afraid to dive into new technologies and learn them quickly.

I'm proud to be a developer - it's a beautiful way to feel good and cool!

Experiencia

Globant

Web UI Developer

marzo de 2017 - Present

Medellín

At Globant I'm a semi-senior developer and worked mainly with React.js, I used different libraries like react.js, lodash.js and redux.js.

Huge

Junior Front-End Developer

noviembre de 2015 - febrero de 2017 (1 año 4 meses)

Medellín

At Huge I was a Junior Front-End Developer and I built applications using different programming languages and technologies, keeping an ability and desire to learn more and learn faster every day. In that time I had an opportunity to learn about the following technologies and frameworks:

Technologies

HTML

CSS

JS

Version Control (GIT)

Frameworks and Libraries

React

ReactDOM

ReactRouter

Redux

Greensock

Webpack

jQuery

Yeoman

Jasmin

Jest

Enzyme

Educación

SENA

Multimedia Production · (2014 - 2016)

Universidad Nacional Abierta y a Distancia

Ingeniería, Ingeniería de sistemas · (2018)
